Reclaiming Late-Romantic Music Peter Franklin 2014-02-15 Why are some of the most beloved and frequently performed works of the late-romantic period—Mahler, Delius, Debussy, Sibelius, Puccini—regarded by many critics as perhaps not quite of the first rank? Why has modernist discourse continued to brand these works as overly sentimental and emotionally self-indulgent? Peter Franklin takes a close and even-handed look at how and why late-romantic symphonies and operas steered a complex course between modernism and mass culture in the period leading up to the Second World War. The style's continuing popularity and its domination of the film music idiom (via work by composers such as Max Steiner, Erich Wolfgang Korngold, and their successors) bring late-romantic music to thousands of listeners who have never set foot in a concert hall. Reclaiming Late-Romantic Music sheds new light on these often unfairly disparaged works and explores the historical dimension of their continuing role in the contemporary sound world.

Acting and Singing with Archetypes Janet B. Rodgers 2009 The Mother, the Lover, the Trickster, the Spiritual and Temporal Leader, the Devil—these are just some of the universal essences, known as archetypes, that lie deep within the human spirit; these are forces that we all recognize and embody in some capacity. Acting and Singing with Archetypes is a groundbreaking, experiential book that uses archetypes as the basis of

an unprecedented method of study for actors and singers. By using fifteen archetype explorations that employ vocal exercises, mask making, monologue and scene work, breathing exercises, role playing, storytelling, singing, meditation, self-reflection, and more, this book empowers actors to interpret character and voice in exciting, untraditional ways. The explorations ultimately leave performing artists with the tools they need to develop their theatrical roles to the fullest, utilize their singing and speech abilities with the widest range of emotion, and unlock their overall creative potential. The book also reinforces the importance of breathing, relaxing, stretching, and other physical techniques that enable healthy practice of the craft. Geared toward theatre teachers, directors, and theatre workshop leaders, this is an incredible teaching tool, accompanied by a CD of demonstrative recordings of vocal exercises and other guiding content sung and spoken by authors Janet B. Rodgers and Frankie Armstrong. Book jacket.

Communities of Musical Practice Ailbhe Kenny 2016-04-28 Every day people come together to make music. Whether amateur or professional, young or old, jazz enthusiasts or rock stars, what is common to all of these musical groups is the potential to create communities of musical practice (CoMP). Such communities are created through practices: ways of engaging, rules, membership, roles, identities and learning that is both shared through collective musical endeavour and situated within certain sociocultural contexts. Ailbhe Kenny investigates CoMP as a rich model for community

engagement, musical participation and transformation in music education. This book is the first to produce a valid and reliable in-depth study of music communities using a community of practice (CoP) framework - in this case focusing on the social process of musical learning. Employing case study research within Ireland, three illustrations from particular sociocultural, genre-specific, economic and geographical contexts are examined: an adult amateur jazz ensemble, a youth choir, and an online Irish traditional music web platform. Each case is analysed as a distinct community and phenomenon offering sharpened understandings of each sub-culture with specific findings presented for each community.

The Oxford Handbook of Musical Repatriation Frank Gunderson 2019 The Oxford Handbook of Musical Repatriation is a significant edited volume that critically explores issues surrounding musical repatriation, chiefly of recordings from audiovisual archives. The Handbook provides a dynamic and richly layered collection of stories and critical questions for anyone engaged or interested in repatriation or archival work. Repatriation often is overtly guided by an ethical mandate to "return" something to where it belongs, by such means as working to provide reconnection and Indigenous control and access to cultural materials. Essential as these mandates can be, this remarkable volume reveals dimensions to repatriation beyond those which can be understood as simple acts of "giving back" or returning an archive to its "homeland."

Musical repatriation can entail subjective negotiations involving living subjects, intangible elements of cultural heritage, and complex histories, situated in intersecting webs of power relations and manifold other contexts. The forty-eight expert authors of this book's thirty-eight chapters engage with multifaceted aspects of musical repatriation, situating it as a concept encompassing widely ranging modes of cultural work that can be both profoundly interdisciplinary and embedded at the core of ethnographic and historical scholarship. These authors explore a rich variety of these processes' many streams, making the volume a compelling space for critical analysis of musical repatriation and its wider significance. The Handbook presents these chapters in a way that offers numerous emergent perspectives, depending on one's chosen trajectory through the volume. From retracing the paths of archived collections to exploring memory, performance, research goals, institutional power, curation, preservation, pedagogy and method, media and transmission, digital rights and access, policy and privilege, intellectual property, ideology, and the evolving institutional norms that have marked the preservation and ownership of musical archives-The Oxford Handbook of Musical Repatriation addresses these key topics and more in a deep, richly detailed, and diverse exploration.

Reclaiming the Sacred Raymond-Jean Frontain 1997 A thought-provoking look at the

Bible! Reclaiming the Sacred: The Bible in Gay and Lesbian Culture explores the territory between gay/lesbian studies, literary criticism, and religious studies. This book examines the appropriation and/or subversion of the authority of the Judeo-Christian bible by gay and lesbian writers. Two prevalent trends in gay and lesbian literature are highlighted--a transgressive approach that challenges the authority of the Bible when used as an instrument of oppression, and an appropriative technique that explores how the Bible contributes to defining gay and lesbian spirituality. Reclaiming the Sacred is unique in its exploration of the area between literary criticism and religious studies. Whereas contemporary literary-critical theory has been slow to integrate religion and religious history into queer theory, this pioneering journal addresses the issue with a collection of thoughtful and thought-provoking articles. Academics and lay readers interested in literary criticism, cultural studies, and religious studies will gain new insights from topics such as: sodomite rhetoric in a seventeenth-century Italian text Radclyffe Hall's lesbian messiah in her 1928 novel *The Well of Loneliness* homosexual temptation in John Milton's *Paradise Regained* Oscar Wilde's usurpation of the language of both *The Song of Songs* and *The Book of Revelation* to ape the paradox of biblical sensuality and construct an alternative identity Reclaiming the Sacred counteracts the manipulative and oppressive uses to which modern writers and thinkers put the Bible and the "morality" it is supposed to inscribe. An important tool for understanding the role of the Bible in gay and lesbian culture, this remarkable book

makes a powerful contribution to the advancement of studies on queer sanctity.

The Confident Choir Michael Bonshor 2017-12-06 The Confident Choir is an exploration of conditions affecting the confidence levels in singers of all levels to create an accessible synthesis of the psychological models and offer practical confidence-building strategies for conductors, teachers, community musicians, and workshop leaders. Michael Bonshor combines his experience as a singing teacher and choral director with a series of in-depth interviews that give an intimate depiction of the challenges faced by the contemporary choral singer. These insights provide the basis for a range of suggested techniques to bolster confidence and reduce anxiety in the group-singing context. This book is primarily designed as a guide for leaders of amateur group singing activities and is relevant to choirs of all sizes and genres. The content will appeal to singers, teachers, and choir leaders; students and scholars in the fields of choral research, community music, music psychology, and adult education; and educators training the musical leaders of the future.

Reclaiming Our Health Michelle A. Gourdine 2011-04-26 “An interactive and empowering book” to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans “are affected by serious diseases and health conditions at far greater rates than other Americans.” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions,

and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, “I wrote this book to empower our community to solve our own health problems and save our own lives.”

The Oxford Handbook of Music and World Christianities Suzel Ana Reily 2016 The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions, music and religious utopias (and other oppositional religious communities), music and conflict, music and transnational flows, and music

and everyday life. The volume as a whole, then, approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate (and change) between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious, moral, and cultural values in a long history of intercultural and transnational encounters.

The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing
Rachel Heydon 2020-05-19 The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing explores the connections between singing and health, promoting the power of singing—in public policy and in practice—in confronting health challenges across the lifespan. These chapters shape an interdisciplinary research agenda that advances singing's theoretical, empirical, and applied contributions, providing methodologies that reflect individual and cultural diversities. Contributors assess the current state of knowledge and present opportunities for discovery in three parts: Singing and Health Singing and Cultural Understanding Singing and Intergenerational Understanding In 2009, the Social Sciences and Humanities

Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, *The Routledge Companion to Interdisciplinary Studies in Singing* consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume III: Wellbeing focuses on this third question and the health benefits of singing, singing praises for its effects on wellbeing.

The Oxford Handbook of Music Making and Leisure Roger Mantie 2017-01-02 Music has been a vital part of leisure activity across time and cultures. Contemporary commodification, commercialization, and consumerism, however, have created a chasm between conceptualizations of music making and numerous realities in our world. From a broad range of perspectives and approaches, this handbook explores avocational involvement with music as an integral part of the human condition. The chapters in *The Oxford Handbook of Music Making and Leisure* present myriad ways for reconsidering and refocusing attention back on the rich, exciting, and emotionally charged ways in which people of all ages make time for making music. The contexts discussed are broadly Western, including an eclectic variety of voices from scholars across fields and disciplines, framing complex and multifaceted phenomena that may

be helpfully, enlighteningly, and perhaps provocatively framed as music making and leisure. This volume may be viewed as an attempt to reclaim music making and leisure as a serious concern for, amongst others, policy makers, scholars, and educators who perhaps risk eliding some or even most of the ways in which music - a vital part of human existence - is integrated into the everyday lives of people. As such, this handbook looks beyond the obvious, asking readers to consider anew, "What might we see when we think of music making as leisure?"

Musical Pathways in Recovery Gary Ansdell 2016-09-17 "Music triggered a healing process from within me. I started singing for the joy of singing myself and it helped me carry my recovery beyond the state I was in before I fell ill nine years ago to a level of well-being that I haven't had perhaps for thirty years." This book explores the experiences of people who took part in a vibrant musical community for people experiencing mental health difficulties, SMART (St Mary Abbots Rehabilitation and Training). Ansdell (a music therapist/researcher) and DeNora (a music sociologist) describe their long-term ethnographic work with this group, charting the creation and development of a unique music project that won the 2008 Royal Society for Public Health Arts and Health Award. Ansdell and DeNora track the 'musical pathways' of a series of key people within SMART, focusing on changes in health and social status over time in relation to their musical activity. The book includes the voices and perspectives of project members and develops with them a new understanding of how

music promotes their health and wellbeing. A contemporary ecological understanding of 'music and change' is outlined, drawing on and further developing theory from music sociology and Community Music Therapy. This innovative book will be of interest to anyone working in the mental health field, but also music therapists, sociologists, musicologists, music educators and ethnomusicologists. This volume completes a three part 'triptych', alongside the other volumes, Music Asylums: Wellbeing Through Music in Everyday Life, and How Music Helps: In Music Therapy and Everyday Life.

Reclaiming Calliope Fides Krucker 2022-08-02 The practice and politics of the unfettered female voice--reclaiming your power through voice, song, and opera-inspired exercises. For centuries, opera has used women's voices to convey male stories. Within an art form dominated by men, the female voice is a means to an end: controlled, denatured, and crafted to carry words and intentions that belie the true depth and complexity of the female experience. Here, author and opera singer Fides Krucker shows readers what it means to find--and use--our authentic voice, to sing wildly and uninhibited from the depths of our bodies and spirits. Part memoir, part radical vocal guide, and part feminist call to action, *Reclaiming Calliope* offers an intriguing look at the rarified world of opera, with fascinating behind-the-scenes details to which outsiders don't typically have access. Through incisive critique, personal stories, and intriguing exposé, Krucker razes the male gaze that packaged characters like *Carmen*, *Tosca*, and *La Traviata's* Violetta for viewer consumption--and radically envisions an empowered, new way of finding and fueling the authentic female voice. Through a series of breathing and vocal prompts that anyone--not just singers--can do, Krucker helps readers reconnect to their authentic primal voices: she takes the reader inside her vocal studio to learn new methods of breath, voicework, and embodiment to

uncover and access personal and social truths. Each chapter includes a theme-related exercise--an act of expression, release, self-discovery, or resistance--that guides readers to develop voices unbound from anyone else's storytelling, boldly and without apology.

Who Could Ask for More? Chris Gregory 2008 Who Could Ask For More is both an in-depth study of The Beatles' songs and an often oblique commentary on their life and times. Identifying the constant fear of an imminent nuclear holocaust as the spark for the huge social changes of the decade, Chris Gregory seeks to 'reclaim' The Beatles from the tendency to position them within a fake 'sixties nostalgia' industry. Combining analysis of their words and music with fictionalised sequences depicting key episodes in their career, the book provides a unique insight into an artistic and cultural phenomenon whose effects still resonate strongly many decades after the group broke up. The extraordinary evolution of their art is discussed in relation to the musical context of their day, with particular emphasis on the influence of 50s rock and roll and 60s soul music.

The Routledge Companion to the Study of Local Musicking Suzel A. Reily 2018-03-14 The Routledge Companion to the Study of Local Musicking provides a reference to how, cross-culturally, musicking constructs locality and how locality is constructed by the musicking that takes place within it, that is, how people engage with ideas of community and place through music. The term "musicking" has gained currency in

music studies, and refers to the diverse ways in which people engage with music, regardless of the nature of this engagement. By linking musicking to the local, this book highlights the ways in which musical practices and discourses interact with people's everyday experiences and understandings of their immediate environment, their connections and commitment to that locality, and the people who exist within it. It explores what makes local musicking "local." By viewing musicking from the perspective of where it takes place, the contributions in this collection engage with debates on the processes of musicking, identity construction, community-building and network formation, competitions and rivalries, place and space making, and local-global dynamics.

Community-based Traditional Music in Scotland Josephine L. Miller 2022-10-07 This book examines the community-based learning and teaching of 'traditional' music in contemporary Scotland, with implications for transnational theoretical issues. The book draws on a broad range of scholarship and a local case study of a large organisation. A historical perspective provides an overview of new educational formats emerging from the mid-twentieth century folk music revival in Scotland. Practices through which participants encounter and perpetuate the idiom of traditional music include social music-making, learning by ear and participatory and presentational elements of musical performances. Individuals are shown as combining these aspects with their own learning strategies to participate in the contemporary community of practice of traditional music. The work also discusses how experiences of learning contribute to identity formation, including the role and practice of 'tutors' of traditional music. The author proposes conceptualising the teaching and learning of traditional music in community-based organisations as a 'pedagogy of participation'.

Reclaiming Indigenous Voice and Vision Marie Battiste 2011-11-01 The essays in Reclaiming Indigenous Voice and Vision spring from an International Summer Institute held in 1996 on the cultural restoration of oppressed Indigenous peoples. The contributors, primarily Indigenous, unravel the processes of colonization that enfolded

modern society and resulted in the oppression of Indigenous peoples.

Singing Out Heather MacLachlan 2020-12-01 Can you change the world through song? This appealing idea has long been the professed aim of singers who are part of choruses affiliated with the Gay and Lesbian Association of Choruses (GALA). These choruses first emerged in the 1970s, and grew out of a very American tradition of (often gender-segregated) choral singing that explicitly presents itself as a community-based activity. By taking a close look at these choruses and their mission, Heather MacLachlan unpacks the fascinating historical and cultural dynamics behind groups that seek to change society for the better by encouraging acceptance of LGBT-identified people and promoting diversity more generally. She characterizes their mission as “integrationist rather than liberationist” and zeroes in on the inherent tension between GALA’s progressive social goals and the fact that the music most often performed by GALA groups is deeply rooted in a fairly narrowly conceived tradition of art music that identifies as white, Euro-centric, and middle class--and that much of the membership identifies as white and middle class as well. Pundits often wax eloquent about the power of music, asserting that it can, in some positive way, change the world. Such statements often rest on an unexamined claim that music can and does foster social justice. *Singing Out: GALA Choruses and Social Change* tackles the premise underlying such claims, analyzing groups of amateur singers who are explicitly

committed to an agenda of social justice.

Studying Congregational Music Andrew Mall 2021-02-15 Studying the role of music within religious congregations has become an increasingly complex exercise. The significant variations in musical style and content between different congregations require an interdisciplinary methodology that enables an accurate analysis, while also allowing for nuance in interpretation. This book is the first to help scholars think through the complexities of interdisciplinary research on congregational music-making by critically examining the theories and methods used by leading scholars in the field. An international and interdisciplinary panel of contributors introduces readers to a variety of research methodologies within the emerging field of congregational music studies. Utilizing insights from fields such as communications studies, ethnomusicology, history, liturgical studies, popular music studies, religious studies, and theology, it examines and models methodologies and theoretical perspectives that are grounded in each of these disciplines. In addition, this volume presents several “key issues” to ground these interpretive frameworks in the context of congregational music studies. These include topics like diaspora, ethics, gender, and migration. This book is a new milestone in the study of music amongst congregations, detailing the very latest in best academic practice. As such, it will be of great use to scholars of religious studies, music, and theology, as well as anyone engaging in ethnomusicological studies more generally.

Music as Heritage Barley Norton 2018-07-20 As economic, technological and cultural

change gathers pace across the world, issues of music heritage and sustainability have become ever more pressing. Discourse on intangible cultural heritage has developed in complex ways in recent years, and musical practices have been transformed by safeguarding agendas. Music as Heritage takes stock of these transformations, bringing new ethnographic and historical perspectives to bear on our encounters with music heritage. The volume evaluates the cultural politics, ethics and audiovisual representation of music heritage; the methods and consequences of music transmission across national borders; and the perennial issues of revival, change and innovation. UNESCO's 2003 Convention for the Safeguarding of the Intangible Cultural Heritage provides an essential reference point for studies of music heritage. However, this volume also pays attention to important spheres of musical activity that lie outside of UNESCO's reach and the reasons why some repertoires of music are chosen for safeguarding while others are not. Some practices of art music in Europe explored in this book, for example, have received little attention despite being susceptible to endangerment. Developing a comparative framework that cuts across genre distinctions and disciplinary boundaries, Music as Heritage explores how music cultures are being affected by heritage discourse and the impact of international and national policies on grass-roots music practices.

The Impacts of Neoliberalism on US Community Colleges Greg Sethares 2020-03-26
Focusing on community colleges as a unique structure within American higher

education, this text investigates the specific ways in which these institutions have been impacted by a global increase in neoliberal education policies. Analyzing the effects neoliberalism has had on community colleges, the text charts discourse relating the erosion of faculty voice in academic governance, and decision making; the vocationalization of curriculum; and the impact that these factors have had on the ability of community colleges to provide students with an education that supports a democratic society. Exposing a movement away from the historical aims of community-based education, the text evidences a hijacking of community colleges to serve the objectives of the corporate elite. There has been a decline in community college faculty engagement in shared governance and their loss of recognition as academic and curricular leaders, and the book discusses the potential for redistribution of decision-making power back toward faculty. This text will be of great interest to graduate and postgraduate students, academics, professionals and policy-makers in the fields of Higher Education, Education Policy and Politics, Sociology of Education, Higher Education Management and Education Politics.

Cathy Berberian: Pioneer of Contemporary Vocality Dr Francesca Placanica 2014-10-28 Cathy Berberian (1925-1983) was a vocal performance artist, singer and composer who pioneered a way of composing with the voice in the musical worlds of Europe, North America and beyond. As a modernist muse for many avant-garde composers, Cathy Berberian went on to embody the principles of postmodern thinking in her work,

through vocality. She re-defined the limits of composition and challenged theories of the authorship of the musical score. This volume celebrates her unorthodox path through musical landscapes, including her approach to performance practice, gender performativity, vocal pedagogy and the culturally-determined borders of art music, the concert stage, the popular LP and the opera industry of her times. The collection features primary documentation-some published in English for the first time-of Berberian's engagement with the philosophy of voice, new music, early music, pop, jazz, vocal experimentation and technology that has come to influence the next generation of singers such as Theo Bleckmann, Susan Botti, Joan La Barbara, Rinde Eckert Meredith Monk, Carol Plantamura, Candace Smith and Pamela Z. Hence, this timely anthology marks an end to the long period of silence about Cathy Berberian's championing of a radical rethinking of the musical past through a reclaiming of the voice as a multifaceted phenomenon. With a Foreword by Susan McClary.

Reclaiming Banished Voices Lawrence J. Lincoln MD 2017-12-21 Lawrence J. Lincoln had no idea how a near-forgotten childhood event had impacted his adult relationships and busy medical career. His life changed dramatically as he gradually discovered that injured or neglected children often take revenge on the least dangerous person in their

universe: themselves. As a result, we banish the most vulnerable, frightened, and tender parts of ourselves so that we are not hurt again. In *Reclaiming Banished Voices*, Larry fills the pages with stories and teachings that illustrate the consequences of this sabotage to our personal lives, our relationships, and society. With intellectual clarity and emotional poignancy, he also offers a technique to reclaim our full selves and live a connected and fulfilling life. Drawing on his years of leading workshops with Dr. Elisabeth Kübler-Ross, as well as his vast experience as an infectious disease and hospice clinician, Lincoln provides multiple examples of the transformative power of compassion and love. Part memoir, part treatise on the value of the externalization of emotions, and part roadmap for those searching for elusive contentment, this book will help you reclaim voices from the past, become a better parent, partner or friend, and live a fully engaged life.

Singing for Our Lives Campaign Choirs Writing Collective 2020-07-17 The Campaign Choirs Network is a loose affiliation of like-minded choirs across the UK sharing a belief in a better world for all and dedicated to taking action by singing about it; the Campaign Choirs Writing Collective is a part of that network. The book intends to inspire the reader to engage with this world: to find out more, to join a choir in their community, to enlist their local street choir to support campaigns for social change and, more generally, to mobilize artistic creativity in progressive social movements. It is an introduction to street choirs and their history, exploring origins in and connections with

other social movements, for example the Workers Education Association, the Clarion movement, Big Flame and the Social Forum movement. The book identifies the political nodes where choir histories intersect, notably Greenham Common, the Miners' Strike, anti-apartheid and Palestinian struggles. The title of the book is taken from a song by the respected American musician and activist Holly Near, and is popular in the repertoire of many street choirs. Exploring the role of street choirs in political culture, *Singing For Our Lives* introduces this neglected world to a wider public, including activists and academics. *Singing for Our Lives* also elaborates the personal stories and experiences of people who participate in street choirs, and the unique social practices created within them. The book tells the important, if often overlooked story, of how making music can contribute to non-violent, just and sustainable social transitions. The Campaign Choirs Writing Collective are Kelvin Mason, Jenny Patient and Lotte Reimer. Kelvin Mason is a writer and researcher with a background in social movement activism and academia, particularly participatory action research (PAR). Jenny Patient is an environmental campaigner with Sheffield Climate Alliance, engaged in action research on the future of energy-intensive industries in Yorkshire and the Humber. Her background is in teaching, community development and project management, and she loves to sing in the streets and on actions and is currently working on a Ph.D. at the University of Sheffield, UK. Lotte Reimer is an activist, singer, engineer and an environmental management consultant with a keen interest in promoting song as a

political tool. She is a prime mover in the Campaign Choirs Network, a Natural Voice Practitioner, choir leader and member of the Natural Voice Network. Gavin Brown is Professor of Political Geography & Sexualities at the University of Leicester and Campaign Choirs Writing Collective academic adviser and editor. He has researched a range of LGBTQ social movements and has recently written a book about young people's involvement in anti-apartheid solidarity activism in London in the 1980s. www.singing4ourlives.net/about.html

Community Music at the Boundaries Lee Willingham 2021-04-06 Music lives where people live. Historically, music study has centred on the conservatory, which privileges the study of the Western European canon and Western European practice . The Eurocentric way music has been studied has excluded communities that are considered to be marginalized in one or more ways despite that the majority of human experiences with music is found outside of that realm. Community music has emerged as a counter-narrative to the hegemonic music canon: it seeks to increase the participation of those living on the boundaries. Community Music at the Boundaries explores music and music-making on those edges. "The real power of community music," writes Roger Mantie in the foreword, "lies not in the fiction of trying to eliminate boundaries (or pretending they don't exist), but in embracing the challenge of 'walking' them." Contributions from scholars and researchers, music practitioners, and administrators examine the intersection of music and communities in a variety of music-

making forms: ensembles, university and police choirs, bands, prison performing groups, youth music groups, instrument classes, symphonies, drum circles, and musical direction and performance. Some of the topics explored in the volume include education and change, music and Indigenous communities, health and wellness, music by incarcerated persons, and cultural identity. By shining a light on boundaries, this volume provides a wealth of international perspectives and knowledge about the ways that music enhances lives.

Singing the Rite to Belong Helen Phelan 2017 This book explores the way in which singing can foster experiences of belonging through ritual performance. Based on more than two decades of ethnographic, pedagogical and musical research, it is set against

the backdrop of -the new Ireland- of the late 20th and early 21st centuries. Charting Ireland's growing multiculturalism, changing patterns of migration, the diminished influence of Catholicism, and synergies between indigenous and global forms of cultural expression, it explores rights and rites of belonging in contemporary Ireland. Helen Phelan examines a range of religious, educational, civic and community-based rituals including religious rituals of new migrant communities in -borrowed- rituals spaces; baptismal rituals in the context of the Irish citizenship referendum; rituals that mythologize the core values of an educational institution; a ritual laboratory for students of singing; and community-based festivals and performances. Her investigation peels back the physiological, emotional and cultural layers of singing to illuminate how it functions as a potential agent of belonging. Each chapter engages theoretically with one of five core characteristic of singing (resonance, somatics, performance, temporality, and tacitness) in the context of particular performed rituals. Phelan offers a persuasive proposal for ritually-framed singing as a valuable and potent tool in the creation of inclusive, creative and integrated communities of belonging.

The Oxford Handbook of Community Music Brydie-Leigh Bartleet 2018-02-01

Community music as a field of practice, pedagogy, and research has come of age. The past decade has witnessed an exponential growth in practices, courses, programs, and research in communities and classrooms, and within the organizations dedicated to the subject. The Oxford Handbook of Community Music gives an authoritative and

comprehensive review of what has been achieved in the field to date and what might be expected in the future. This Handbook addresses community music through five focused lenses: contexts, transformations, politics, intersections, and education. It not only captures the vibrant, dynamic, and divergent approaches that now characterize the field, but also charts the new and emerging contexts, practices, pedagogies, and research approaches that will define it in the coming decades. The contributors to this Handbook outline community music's common values that center on social justice, human rights, cultural democracy, participation, and hospitality from a range of different cultural contexts and perspectives. As such, *The Oxford Handbook of Community Music* provides a snapshot of what has become a truly global phenomenon.
