Appetites and Anxieties Diane Carson 2013-12-01 Cinema is a mosaic of memorable food scenes. Detectives drink alone. Gangsters talk with their mouths full. Families around the world argue at dinner. Food documentaries challenge popular consumption-centered visions. In *Appetites and Anxieties: Food, Film, and the Politics of Representation*, authors Cynthia Baron, Diane Carson, and Mark Bernard use a foodways paradigm, drawn from the fields of folklore and cultural anthropology, to illuminate film's cultural and material politics. In looking at how films do and do not represent food procurement, preparation, presentation, consumption, clean-up, and disposal, the authors bring the pleasures, dangers, and implications of consumption to center stage.

In nine chapters, Baron, Carson, and Bernard consider food in fiction films and documentaries—from both American and international cinema. The first chapter examines film practice from the foodways perspective, supplying a foundation for the collection of case studies that follow. Chapter 2 takes a political economy approach as it examines the food industry and the film industry's policies that determine representations of food in film. In chapter 3, the authors explore food and food interactions as a means for creating community in Bagdad Café, while in chapter 4 they take a close look at 301/302, in which food is used to mount social critique. Chapter 5 focuses on cannibal films, showing how the foodways paradigm unlocks the implications of films that dramatize one of society's greatest food taboos. In chapter 6, the authors demonstrate ways that insights generated by the foodways lens can enrich genre and auteur studies. Chapter 7 considers documentaries about food and water resources, while chapter 8 examines food documentaries that slip through the cracks of film censorship by going into exhibition without an MPAA rating. Finally, in chapter 9, the authors study films from several national cinemas to explore the intersection of food, gender, and ethnicity. Four appendices provide insights from a food stylist, a selected filmography of fiction films and a filmography of documentaries that feature foodways components, and a list of selected works in food and cultural studies.

Christophe Honoré David A. Gerstner 2015-12-01 French filmmaker Christophe Honoré challenges audiences with complex cinematic form, intricate narrative structures, and aesthetically dynamic filmmaking. But the limited release of his films outside of Europe has left him largely unknown to U.S. audiences. In *Christophe Honoré: A Critical Introduction*, authors David A. Gerstner and Julien Nahmias invite English-speaking scholars and cinéastes to explore Honoré's three most recognized films, *Dans Paris* (2006), *Les Chansons d'amour* (2007), and *La Belle personne* (2008)—"the trilogy." Gerstner and Nahmias analyze Honoré's filmmaking as the work of a queer auteur whose cinematic engagement with questions of family, death, and sexual desire represent new ground for queer theory. Considering each of the trilogy films in turn, the authors take a close look at Honoré's cinematic technique and how it engages with France's contemporary cultural landscape. With careful attention to the complexity of Honoré's work, they consider critically contested issues such as the filmmaker's cinematic strategies for addressing AIDS, the depth of his LGBTQ politics, his representations of death and sexual desire, and the connections between his films and the New Wave. Anchored by a comprehensive interview with the director, the authors incorporate classical and contemporary film theories to offer a range of cinematic interventions for thinking queerly about the noted film author. *Christophe Honoré: A Critical Introduction* reconceptualizes the relationship between film theory and queer theory by moving beyond predominant literary and linguistic models, focusing instead on cinematic technique. Students and teachers of queer film will appreciate this thought-provoking volume.

Texas Eats Robb Walsh 2012-03-06 Who says cooking is for homebodies? Veteran Texas food writer Robb Walsh served as a judge at a chuck wagon cook-off, worked as a deckhand on a shrimp boat, and went mayhaw-picking in the Big Thicket. As he drove the length and breadth of the state, Walsh sought out the best in barbecue, burgers, kolaches, and tacos; scoured museums, libraries, and public archives; and unearthed vintage photos, culinary stories, and nearly-forgotten dishes. Then he headed home to Houston to test the recipes he'd collected back in his own kitchen. The result is Texas Eats: The New Lone Star Heritage Cookbook, a colorful and deeply

personal blend of history, anecdotes, and recipes from all over the Lone Star State. In *Texas Eats*, Walsh covers the standards, from chicken-fried steak to cheese enchiladas to barbecued brisket. He also makes stops in East Texas, for some good old-fashioned soul food; the Hill Country, for German- and Czech-influenced favorites; the Panhandle, for traditional cowboy cooking; and the Gulf Coast, for timeless seafood dishes and lost classics like pickled shrimp. *Texas Eats* even covers recent trends, like Viet-Texan fusion and Pakistani fajitas. And yes, there are recipes for those beloved-but-obscure gems: King Ranch casserole, parisa, and barbecued crabs. With more than 200 recipes and stunning food photography, *Texas Eats* brings the richness of Texas food history vibrantly to life and serves up a hearty helping of real Texas flavor.

Collaborative Cyber Threat Intelligence Florian Skopik 2017-10-16 Threat intelligence is a surprisingly complex topic that goes far beyond the obvious technical challenges of collecting, modelling and sharing technical indicators. Most books in this area focus mainly on technical measures to harden a system based on threat intel data and limit their scope to single organizations only. This book provides a unique angle on the topic of national cyber threat intelligence and security information sharing. It also provides a clear view on ongoing works in research laboratories world-wide in order to address current security concerns at national level. It allows practitioners to learn about upcoming trends, researchers to share current results, and decision makers to prepare for future developments.
