The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Tesol and the Cult of Speed in the Age of Neoliberal Mobility Osman Barnawi 2021-09-30 TESOL and the Cult of Speed in the Age of Neoliberal Mobility argues that because the nexus between TESOL and the cult of speed in an age of increased neoliberal mobility has not yet been explicitly unpacked, discussed, identified and theorized, the implications of this socio-economic phenomenon for TESOL policies, curricula, pedagogies and practices have been overlooked. Through the presentation of several qualitative case studies, the book illustrates the social dynamics of speed and its key aspects (i.e., the materiality and the politics of time) in different TESOL contexts, including Saudi Arabia, the USA and Canada. The aim in presenting these diverse case studies was to craft a collection of responses, which, when put together, could offer new insights into the TESOL academic community. The book examines the ways in which the cult of speed has been envisioned, celebrated, negotiated with, enacted and justified by the various actors within the contemporary field of TESOL. It also investigates the new language teaching practices and forms the cult of speed in TESOL has generated and is generating. TESOL and the Cult of Speed in the Age of Neoliberal Mobility will be of interest to TESOL/applied linguistics educators, students, policy makers, administrators, employers and the wider community, and it is hoped will give them ideas about how to deal with today's culture of fast movement in the globalized higher education landscape.

Utilizing an interdisciplinary approach, the author draws from existing literature, close readings of films and a dataset of hundreds of film reviews, to provide a taxonomy and deep-dive into six unique rationales for remaking premade titles: the better remake; the economic remake; the nostalgic remake; the Americanized remake; the creative remake; the fashionable remake. Million Cars for Billion People Gautam Sen 2014-10-11 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? *A Million Cars for a Billion People* delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

Melothesia in Babylonia Markham Judah Geller 2014-11-10 This monograph begins with a puzzle: a Babylonian text from late 5th century BCE Uruk associating various diseases with bodily organs, which has evaded interpretation. The correct answer may reside in Babylonian astrology, since the development of the zodiac in the late 5th century BCE offered innovative approaches to the healing arts. The zodiac—a means of predicting the movements of heavenly bodies—transformed older divination (such as hemerologies listing lucky and unlucky days) and introduced more favorable magical techniques and medical prescriptions, which are comparable to those found in Ptolemy's *Tetrabiblos* and non-Hippocratic Greek medicine. Babylonian melothesia (i.e., the science of charting how zodiacal signs affect the human body) offers the most likely solution explaining the Uruk tablet.

The Art of Failure Suresh Raval 2022-05-05 Originally published in 1986, this is a powerful and original book. It offers textual interpretation of Conrad's major work and articulates the subtlety and richness of his treatment of social-political institutions and of the forces that complicate and distort private and public life. Suresh Raval argues that the social-personal relations in Conrad's fiction cannot be conceived apart from their existence in the political life of a community; but at the same time they cannot be accommodated institutionally. The author's concern is with the problematic status of the self under various perspectives: experience and understanding (*Heart of Darkness*), an ethical ideal (*Lord Jim*), history (*Nostromo*), ideology (*The Secret Agent* and *Under Western Eyes*), scepticism (*Victory*). What the self is remains ambiguous and elusive. Conrad's fiction is concerned with exhibiting the failure of language, but always as a result of an immense effort of language itself. As language undoes itself in the act of seeking utterance, so Conrad's fictional mode - romance - turns into the opposite of itself as it unfolds. Raval demonstrates that incompatible alternatives - intention and action, thought and experience, the individual and the social, the logical and the contingent - are entangled with each other, and how this entanglement works in the fiction. Raval's exploration of Conrad's scepticism shows why Conrad cannot be characterized as a political conservative or radical without distorting the complexity and seriousness of his reflection on society. For his scepticism is the product not just of intelligence but of intelligence conscious of its limitations, and is thus able to make a devastating critique of the nihilism sometimes attributed to Conrad by critics. Only those who think that morality has to have a secure single foundation if it is to be real are pushed into regarding Conrad's scepticism as a form of nihilism. Professor Raval's important study brings philosophical and literary interests to bear on Conrad's major fiction and illuminates those aspects of his art which have puzzled and fascinated his readers. It will be deservedly valued by those studying and teaching modern literature.

Buried Alive Myra Friedman 2011-04-27 Electrifying, highly acclaimed, and intensely personal, this new and updated version of Myra Friedman's classic biography of Janis Joplin teems with dramatic insights into Joplin's genius and into the chaotic times that catapulted her to fame as the legendary queen of rock. It is a stunning panorama of the turbulent decade when Joplin's was the rallying voice of a generation that lost itself in her music and found itself in her words. From her small hometown of Port Arthur, Texas, to San Francisco's Haight-Ashbury, from the intimate coffeehouses to the supercharged concert halls, from the glitter of worldwide fame to her tragic end in a Hollywood hotel, here is all the fire and anguish of an immortal, immensely talented, and troubled performer who devoured everything the rock scene had to offer in a fatal attempt to make peace with herself and her era. Yet, in an eloquent introduction recently written by the author, Joplin emerges from her "ugly duckling" childhood as a woman truly ahead of her time, an outrageous rebel, a defiant outcast and artist of incomparable authenticity who, almost in spite of herself, became to so many a symbol of triumph over adversity. This edition also contains an afterword detailing the whereabouts of a large and colorful cast of characters who were part of Joplin's life, as well as "We Remember Janis," a new chapter of poignant and affectionate anecdotes told by friends.

Odes Sharon Olds 2016-09-08 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, *Observer Book of the Year* Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.
