Start Here Pier Bryden, M.D. 2020-01-28 From two of the top child and adolescent psychiatrists at The Hospital for Sick Children comes an accessible guide to common mental health struggles, such as anxiety and depression, for any parent wondering how to help their child. Is my child okay? Is she eating and sleeping enough? Is he hanging out with the right people? Should I be worried that she spends all her time in her room? Is this just a phase? Or a sign of something serious? As parents, we worry about our children--about their physical health, performance at school, the types of friends they have, and, of course, their mental health. Every day seems to bring new and expanding issues and disorders and troubling statistics about the rise of mental illness in children and teens. It's usually obvious what to do for physical injuries like broken bones, but when it comes to our children's mental health, the answers are much less clear, and sometimes even contradictory. Pier Bryden and Peter Szatmari, top child and adolescent psychiatrists, are here to help. Using their combined six decades working with families and kids--and their own experiences as parents--they break down the stigma of mental health illness and walk parents through the warning signs, risk factors, prevention strategies, and the process of diagnosis and treatment for mental health challenges arising from: --Eating disorders --Anxiety --Psychosis --Sleep Disorders --Substance Use Disorders --ADHD --Autism --Depression --Trauma --Suicidal thoughts and behaviors The most important thing to remember as a parent is that you and your child are not alone. Wellness is a continuum, and there is a lot parents can do to bring their child back to a place of safety. The road ahead isn't always easy or straightforward, but this guidebook offers essential advice that every parent needs to advocate for their child.

So Young, So Sad, So Listen Philip Graham 2020-06-30 "This book is about depression in children and teenagers during their school years, from 5 to 18. It is written primarily for parents, but we hope that teachers, social workers, health visitors and family doctors will also find it useful. Why do parents need to know about possible depression in their children? All children get sad and miserable from time to time. Sometimes it is difficult to know if such normal unhappiness needs special attention. We aim to help parents in this situation. This is an example of a situation in which a mother describes how first she thought her son's problem was nothing much to worry about but then she had to change her mind: Ben's mother, a teacher, described the change that came over her ten-year-old son after a short viral illness"--
