Leonard Bernstein Allen Shawn 2014-09-30 Leonard Bernstein stood at the epicenter of twentieth-century American musical life. His creative gifts knew no boundaries as he moved easily from the podium, to the piano, to television with his nationally celebrated Young People's Concerts, which introduced an entire generation to the joy of classical music. In this fascinating new biography, the breadth of Bernstein's musical composition is explored, through the spectacular range of music he composed—from West Side Story to Kaddish to A Quiet Place and beyond—and through his intensely public role as an internationally celebrated conductor. For the first time, the composer's life and work receive a fully integrated analysis, offering a comprehensive appreciation of a multi-faceted musician who continued to grow as an artist well into his final days.

How to Do Things with Silence Haig Khatchadourian 2015-10-16 This work is a detailed analytical study of different forms of silent doing. It explores a range of topics related to silence, including the theory of silent doing and its relationship to other forms of action and communication, silence and aesthetics, the ethics and politics of silence, and the religious dimensions of silence. The book, as an original contribution to analytical philosophy, should be of interest to philosophers and students.

Language of the Spirit Jan Swafford 2017-04-11 A preeminent composer, music scholar, and biographer presents an engaging and accessible introduction to classical music For many of us, classical music is something serious -- something we study in school, something played by cultivated musicians at fancy gatherings. In Language of the Spirit, renowned music scholar Jan Swafford argues that we have it all wrong: classical music has something for everyone and is accessible to all. Ranging from Gregorian chant to Handel's Messiah, from Vivaldi's The Four Seasons to the postmodern work of Philip Glass, Swafford is an affable and expert guide to the genre. He traces the history of Western music, introduces readers to the most important composers and compositions, and explains the underlying structure and logic of their music. Language of the Spirit is essential reading for anyone who has ever wished to know more about this sublime art.

Gödel, Escher, Bach Douglas R. Hofstadter 2000 'What is a self and how can a self come out of inanimate matter?' This is the riddle that drove Douglas Hofstadter to write this extraordinary book. In order to impart his original and personal view on the core mystery of human existence - our intangible sensation of 'I'-ness - Hofstadter defines the playful yet seemingly paradoxical notion of 'strange loop', and explicates this idea using analogies from many disciplines.

Bach and Mozart Robert Lewis Marshall 2019 Interpretive and biographical essays by a major authority on Bach and Mozart probe for clues to the driving forces and experiences that shaped the character and the extraordinary artistic achievements of these iconic composers.

The Toolbox Revisited Clifford Adelman 2006 **The Toolbox Revisited** is a data essay that follows a nationally representative cohort of students from high school into postsecondary education, and asks what aspects of their formal schooling contribute to completing a bachelor's degree by their mid-20s. The universe of students is confined to those who attended a four-year college at any time, thus including students who started out in other types of institutions, particularly community colleges.

Reclaiming Our Health Michelle A. Gourdine 2011-04-26 "An interactive and empowering book" to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans "are affected by serious diseases and health conditions at far greater rates than other Americans." In fact, African

Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, "I wrote this book to empower our community to solve our own health problems and save our own lives."

Reinforcement Learning, second edition Richard S. Sutton 2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Drawn to Enchant Timothy Garrett Young 2007-01-01 This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

The Way of Bach Dan Moller 2020-11-03 A tale of passion and obsession from a philosophy professor who learns to play Bach on the piano as an adult. Dan Moller grew up listening to heavy metal in the Boston suburbs. But one day, something shifted when he dug out his mother's record of The Art of the Fugue, inexplicably wedged between ABBA's greatest hits and Kenny Rogers. Moller was fixated on Bach ever since. In The Way of Bach, he draws us into fresh and often improbably hilarious things about Bach and his music. Did you know the Goldberg Variations contain a song about his mom cooking too

much cabbage? Just what is so special about Bach's music? Why does it continue to resonate even today? What can modern Americans—steeped in pop culture—can learn from European craftsmanship? And, because it is Bach, why do some people see a connection between music and God? By turn witty and thought-provoking, Moller infuses *The Way of Bach* with philosophical considerations about how music and art enable us to contemplate life's biggest questions.

Tea War Andrew B. Liu 2020-04-14 A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industries Tea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

[An Index to Articles Published in The Etude Magazine, 1883-1957, Part 2](#) Pamela Richardson Dennis 2011-01-01 Annotation: The Index is published in two physical volumes and sold as a set for \$250.00. As America's geography and societal demands expanded, the topics in *The Etude* magazine (first published in 1883) took on such important issues as women in music; immigration; transportation; Native American and African American composers and their music; World War I and II; public schools; new technologies (sound recordings, radio, and television); and modern music (jazz, gospel, blues, early 20th century composers) in addition to regular book reviews, teaching advice, interviews, biographies, and advertisements. Though a valued source particularly for private music teachers, with the de-emphasis on the professional elite and the decline in salon music, the magazine ceased publication in 1957. This Index to the articles in *The Etude* serves as a companion to E. Douglas Bomberger's 2004 publication on the music in *The Etude*. Published a little over fifty years after the final issue reached the public, this Index chronicles vocal and instrumental technique, composer biographies, position openings, department store orchestras, the design of a successful music studio, how to play an accordion, recital programs in music schools, and much more. The Index is a valuable tool for research, particularly in the music culture of American in the late nineteenth and early twentieth centuries. With titles of these articles available, the doors are now open for further research in the years to come.

How to Listen to and Understand Opera Teaching Company 1997-01-01 32 Lectures on the history of opera is traced from its beginning in the early 17th century to around 1924. The lectures examine landmark operas; musical, cultural, and social developments that influenced opera's growth; and the influence of national languages and cultures on opera.

[Bach's Musical Universe: The Composer and His Work](#) Christoph Wolff 2020-03-24 A concentrated study of Johann Sebastian Bach's creative output and greatest pieces, capturing the essence of his art. Throughout his life, renowned and prolific composer Johann Sebastian Bach articulated his views as a composer in purely musical terms; he was notoriously reluctant to write about his life and work. Instead, he methodically organized certain pieces into carefully designed collections. These benchmark works, all of them without parallel or equivalent, produced a steady stream of transformative ideas that stand as paradigms of Bach's musical art. In this companion volume to his Pulitzer Prize–finalist biography, *Johann Sebastian Bach: The Learned Musician*, leading Bach scholar Christoph Wolff takes his cue from his famous subject. Wolff delves deeply into the composer's own rich selection of collected music, cutting across conventional boundaries of era, genre, and instrument. Emerging from a complex and massive oeuvre, *Bach's Musical Universe* is a focused discussion of a meaningful selection of compositions—from the famous *Well-Tempered Clavier*, violin and cello solos, and *Brandenburg Concertos* to the *St. Matthew Passion*, *Art of Fugue*, and *B-minor Mass*. Unlike any study undertaken before, this book details Bach's creative process across the various instrumental and vocal genres. This array of compositions illustrates the depth and variety at the essence of the composer's musical art, as well as his unique approach to composition as a process of imaginative research into the innate potential of his chosen material. Tracing Bach's evolution as a composer, Wolff compellingly illuminates the ideals and legacy of this giant of classical music in a new, refreshing light for everyone, from the amateur to the

virtuoso.

Evening in the Palace of Reason James R. Gaines 2006-02-28 Johann Sebastian Bach created what may be the most celestial and profound body of music in history; Frederick the Great built the colossus we now know as Germany, and along with it a template for modern warfare. Their fleeting encounter in 1757 signals a unique moment in history where belief collided with the cold certainty of reason. Set at the tipping point between the ancient and modern world, Evening in the Palace of Reason captures the tumult of the eighteenth century, the legacy of the Reformation, and the birth of the Enlightenment in this extraordinary tale of two men.

Globalization at Risk Gary Clyde Hufbauer 2010-10-19 History has declared globalization the winner of the 20th century. Globalization connected the world and created wealth unimaginable in the wake of the Second World War. But the financial crisis of 2008-09 has now placed at risk the liberal economic policies behind globalization. Engulfing the entire world, the crisis gave new fuel to the skeptics of the benefits of economic integration. Policy responses seem to favor anti-globalizers. New regulations could balkanize the global financial system, while widespread protectionist impulses might undo the Doha Round. Issues from climate change to national security may be used as convenient excuses to keep imports out, keep jobs at home, and to clamp down on global capital. Will globalization triumph or perish in the 21st century? What reforms make sense in the post-crisis world? International economists Gary Clyde Hufbauer and Kati Suominen argue that globalization has been a force of great good, one that needs to be actively advanced and honed. Drawing on the latest economic analyses, they reveal the drivers and effects of global finance and trade, lay out the key risks to globalization, and offer a practical policy roadmap for managing the challenges while increasing the gains. Vital reading for anyone in business, finance, foreign affairs, or economics, Globalization at Risk is sure to advance public debate on this defining issue of the 21st century.

Higher Expectations Derek Bok 2020-08-25 How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful

lives.

Doing School Denise Clark Pope 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?
