The Intelligent Woman's Guide to Socialism and Capitalism Bernard Shaw 1984 With great wit and forcefulness, Shaw here presents the conditions under which he thought the world could look forward to the future with hope. This book sets out most completely Shaw's indictment of capitalism as the source of both domestic injustice and international enmity, and his arguments for a socialist egalitarian society as the only society assured a healthy future. Woman's Work in America Annie Nathan Meyer 1891 The chapters in this book on women in law, medicine, journalism, etc. were written by leading women in each field. Written at the height of the 19th century women's movement, they reflect the wide range of areas then opening up to women for the first time.

What is a Woman to Do? Kyriaki Hadjiafxendi 2011 This anthology contributes to a scholarly understanding of the aesthetics and economics of female artistic labour in the Victorian period. It maps out the evolution of the Woman Question in a number of areas, including the status and suitability of artistic professions for women, their engagement with new forms of work and their

changing relationship to the public sphere. The wealth of material gathered here - from autobiographies, conduct manuals, diaries, periodical articles, prefaces and travelogues - traces the extensive debate on women's art, feminism and economics from the 1830s to the 1890s. Combining for the first time nineteenth-century criticism on literature and the visual arts, performance and craftsmanship, the selected material reveals the different ideological positions surrounding the transition of women from idleness to serious occupation. The distinctive primary sources explore the impact of artistic labour upon perceptions of feminine sensibility and aesthetics, the conflicting views of women towards the pragmatics of their own creative labour as they encompassed vocations, trades and professions, and the complex relationship between paid labour and female fame and notoriety.

Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory Musingafi, Maxwell Constantine Chando 2021-04-23 Much of our understanding of the world, our societies, and ourselves rests on theories and knowledge generated predominantly by men of certain nationalities and economic classes. This male-dominated and culturally specific theorizing and knowledge have generally resulted in the exclusion of women and other groups from the process of formal theorizing and knowledge building. Feminism argues that the male-dominated knowledge represents a skewed perception of reality and is only partial knowledge.

Feminism is a generalized, wide-ranging system of ideas about social life and human experience developed from a woman-centered perspective. It treats women as the central subjects in the investigative process and seeks to see the world from the distinctive vantage points of women in the social world. The best way to empower women and better the situation for women is to take women's daily experiences and their informal theorizing into account and, on this basis, adopt feminist approaches to building theory and knowledge.

Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory provides an overview and introduction to the study of feminist theory and practice in the social sciences. This book provides a starting point for further and more advanced study of the nexus of feminism, gender, and development and translates feminist theory and concepts into practice. The chapters investigate, in a historical context, mainstream and contemporary theories of feminism and gender studies. This book is ideal for post-graduate students of social science; researchers of development management, business management, public governance, and gender and development; activists; feminists; and practitioners, stakeholders, researchers, academicians, and students interested in feminist theory and knowledge building.

Ending Discrimination Against People with Mental and Substance Use Disorders National Academies of Sciences, Engineering, and Medicine 2016-09-03 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

The New Century for Woman 1876

The "People Power" Women's Guide (Identity, Independence, Fashion, Feminism, Family, Happiness, Domestic Violence: Live a Better Life) Tony Kelbrat 2013-12-06 Women have been defined by men in men's terms until relatively recently but now that women are coming into their own both out in the workforce and as separate entities unto themselves, the question is, once

you throw off the shackles of what it means to be a woman as defined by men all throughout history, what exactly is a woman as the pure essence she is in her soul? Women are as complex and individual as men if they choose to be yet as simple and one-dimensional as the stereotypical caricatures if they choose to be too so women are women just like men are men. In modern society, a woman can be pretty well anything she wants but the problem, hypocrisy or contradiction with all of this is that despite all this talk about freedom and being who you are, beyond a superficial, glossy façade of store-bought trendiness, most women are no different than the woman of 30 years ago and have no desire to be.

The Women's Guide to Surviving Graduate School Barbara Rittner 1997-07-22

The Women's Guide to Surviving Graduate School is an excellent resource for women embarking on this educational journey. It is written by women, specifically for women. It provides information and advice relevant to both American and Canadian women, and focuses on elements related to graduate schools in both countries. The book begins with the basic information about selection, applications, and acceptance processes and goes on to guide women through such issues as determining how much their degree program is likely to cost and how to find funding. The authors also provide valuable advice on determining the best methods for planning a course of study and selecting programs. Finally, this book provides women with practical suggestions for

becoming successful students and finding employment, after graduation.

The Women's Custody Survival Guide 2009

Women Teachers and Feminist Politics, 1900-39 Alison Oram 1996

Women teachers were key players in twentieth century feminism. They fought for women's suffrage before the First World War and continued their vigorous campaigns for equal pay, equal promotion opportunities and abolition of the marriage bar into the less promising political environment of the 1920s and 1930s. This book is the first to offer a detailed assessment of why women teachers were so politically active, and makes an important contribution to the literature on women's politicisation. Drawing on interviews with women teachers (in state elementary and secondary schools) as well as the records of teachers' associations and central and local government, it explores the tensions in the relationship between their position at the workplace and their family lives and unravels the connections and dissonances between how they saw themselves as both women and professional teachers.

Narratives of British Socialism S. Ingle 2002-10-23 What can the study of narratives bring to our understanding of political ideas that other forms of analysis cannot? In *Narratives of British Socialism*, Stephen Ingle shows how imaginative literature can be used to give definition to political thought. The origins, development and eventual decline of British socialism are analyzed in the writings of Morris, Shaw, Wells, Huxley, Koestler, Orwell and others. Ingle concludes that narratives can give us an experiential understanding of political ideas.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for

their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

New Books on Women and Feminism 1998

Queen Silver Wendy McElroy 2000 This riveting, well-researched book brings to light the dramatic life of a passionate free-speech champion. . . . I couldn't put down this remarkable book. - Nadine Strossen, ACLU President

When she was just eight-years-old, a little girl with the odd name of Queen Silver stunned citizens and scholars alike in pre-1920s Los Angeles by hosting six remarkable public lectures on Darwin and Einstein, sponsored by the London Society of Science. A child prodigy and the daughter of famed socialist activist Grace Vern Silver, founder of the Industrial Workers of the World (IWW), Queen Silver was the subject of Cecil B. De Mille's film *The Godless Girl*. She matured to become an international feminist, atheist, and socialist, living a remarkable and inspiring life, of which few feminists today are aware. *Queen Silver: The Godless Girl* is a fiery and profound biography of one of America's most amazing feminist thinkers, a woman who remained an active advocate of intellectual independence to the moment of her death in 1998 at the age of 86. Prolific feminist writer Wendy McElroy sympathetically chronicles the life of Queen Silver from personal interviews with her friends, published reports, letters, and a vast library of the family's personal papers. What emerges is a life like none other. A well-known thinker by the time she was 11-years-old,

giving speeches titled *Pioneers of Freethought*, *The Rights of Children*, and *Science and the Workers*, Queen challenged three-time presidential candidate William Jennings Bryan to a debate on evolution (he declined); organized an atheist group at her high school; and left home at 15 to marry a doctor three-times her age, which later became the source of a highly publicized divorce. As a teenager, Queen once served as a defense lawyer for her mother and won. She founded the scholarly and well-reviewed *Queen Silver Magazine*, and overcame personal tragedy and political persecution during World War I's red scare. Queen worked as an extra in movies directed by D.W. Griffith, attended violent and controversial meetings of the IWW, and went into hiding at the advent of McCarthyism. In her later years, Queen received many freethought awards, remained active in the American Civil Liberties Union, and campaigned hard for public libraries. McElroy tells a complete story by profiling Queen's mother, lecturer and feminist writer Grace Vern Silver, whose struggles for justice in the IWW found her running for Congress, and whose personal education motivated her to inspire the genius in her daughter. Wendy McElroy (Collingwood, Ontario) has written on women's and related issues for the *National Review*, *Penthouse*, *Liberty*, and *Reason*.

Descartes and Cartesianism Stephen Gaukroger 2017-01-19 This volume is a collection of original essays dealing with Cartesian themes and problems, especially as these arise in connection with Cartesian natural science and the theory of perception, agency, mentality, divinity, and the passions. It focuses in particular on Desmond Clarke's important contributions to these aspects of Descartes's writings. Stephen Gaukroger and Catherine Wilson split the volume into four distinct parts; *Cartesian Science*, *Mind and Perception*, *Actions and Passions*, and *Cartesian Woman*. The contributors are internationally known and respected scholars of 17th century philosophy writing on a number of their favourite Cartesian topics.
