Sofonisba's Lesson Michael Cole 2020-02-11 "Within a span of seven or eight years in the 1550s, the Italian painter Sofonisba Anguissola produced more

self-portraits than any known painter before her had in a lifetime. She was the first known artist in history to take her parents and siblings as primary subject matter, and may have painted the first group portrait featuring only women. Cole examines Sofonisba's paintings as expressions of her relationships and networks, looking at why Sofonisba was able to become a great woman artist: at her father, who decided to allow her to be educated as a painter; at her teacher, Bernardino Campi; and at her relationships with her students, sisters, and patrons, who included the Queen of Spain. Cole demonstrates that Sofonisba made teaching and education a central theme of her painting. The book also provides the first complete catalogue of all of Sofonisba's known works"--

The Book in the Renaissance Andrew Pettegree 2010 The dawn of print was a major turning point in the early modern world. It rescued ancient learning from obscurity, transformed knowledge of the natural and physical world, and brought the thrill of book ownership to the masses. But, as Andrew Pettegree reveals in this work of great historical merit, the story of the post-Gutenberg world was rather more complicated than we have often come to believe. The Book in the Renaissance reconstructs the first 150 years of the world of print, exploring the complex web of religious, economic, and cultural concerns surrounding the printed word. From its very beginnings, the printed book had to straddle financial and religious imperatives, as well as the very different requirements and constraints of the many countries who embraced it, and, as Pettegree argues, the process was far from a runaway success. More than ideas, the success or failure of books depended upon patrons and markets, precarious strategies and the thwarting of piracy, and the ebb and flow of popular demand. Owing to his state-of-the-art and highly detailed research, Pettegree crafts an authoritative, lucid, and truly pioneering work of cultural history about a major development in the evolution of European society.

The Leader in Me Stephen R. Covey 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B. Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows

how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Renaissance Gothic Ethan Matt Kavaler 2012-01-01 This compelling book offers a new paradigm for the periodization of the arts, one that counters a prevailing Italianate bias among historians of northern Europe of this era. The years after 1500 brought the construction of several iconic Late Gothic monuments, including the transept facades of Beauvais cathedral in northern France, much of King's College in Cambridge, England, and the parish church at Annaberg in Saxony. Most designers and patrons preferred this elite Gothic style, which was considered fashionable and highly refined, to alternative Italianate styles. Ethan Matt Kavaler connects Gothic architecture to related developments in painting and other media, and considers the consequences of the breakdown of the Gothic system in the early 16th century. Late Gothic architecture is recognized for its sensuous and abundant ornament. Its visually rich surfaces signify wealth and magnificence, and its flamboyant geometric designs portray a system of perfect and essential forms that convey spiritual authority, while often serving as signs of personal or corporate identity.

Renaissance Gothic presents a groundbreaking and detailed study of the Gothic architecture of the late 15th and 16th centuries across Europe.

Images and Identity in Fifteenth-century Florence Patricia Lee Rubin 2007-01-01 An exploration of ways of looking in Renaissance Florence, where works of art were part of a complex process of social exchange Renaissance Florence, of endless fascination for the beauty of its art and architecture, is no less intriguing for its dynamic political, economic, and social life. In this book

Patricia Lee Rubin crosses the boundaries of all these areas to arrive at an original and comprehensive view of the place of images in Florentine society. The author asks an array of questions: Why were works of art made? Who were the artists who made them, and who commissioned them? How did they look, and how were they looked at? She demonstrates that the answers to such questions illuminate the contexts in which works of art were created, and how they were valued and viewed. Rubin seeks out the meeting places of meaning in churches, in palaces, in piazzas--places of exchange where identities were taken on and transformed, often with the mediation of images. She concentrates on questions of vision and visibility, on "seeing and being seen." With a blend of exceptional illustrations; close analyses of sacred and secular paintings by artists including Fra Angelico, Fra Filippo Lippi, Filippino Lippi, and Botticelli; and wide-ranging bibliographic essays, the book shines new light on fifteenth-century Florence, a special place that made beauty one of its defining features.

The Poison Trials Alisha Rankin 2021-01-05 In 1524, Pope Clement VII gave two condemned criminals to his physician to test a promising new antidote. After each convict ate a marzipan cake poisoned with deadly aconite, one of them received the antidote, and lived—the other died in agony. In sixteenth-century Europe, this and more than a dozen other accounts of poison trials were committed to writing. Alisha Rankin tells their little-known story. At a time when poison was widely feared, the urgent need for effective cures provoked intense excitement about new drugs. As doctors created, performed, and evaluated poison trials, they devoted careful attention to method, wrote detailed experimental reports, and engaged with the problem of using human subjects for fatal tests. In reconstructing this history, Rankin reveals how the antidote trials generated extensive engagement with "experimental thinking" long before the great experimental boom of the seventeenth century and investigates how competition with lower-class healers spurred on this trend. The Poison Trials sheds welcome and timely light on the intertwined nature of medical innovations, professional rivalries, and political power.

Citizenship Curriculum in Asia and the Pacific David L. Grossman 2008-08-31 Based on case studies of 11 societies in the world's most dynamic region, this book signals a new direction of study at the intersection of citizenship education and the curriculum. Following their successful volume, Citizenship

Education in Asia and the Pacific: Concepts and Issues (published as No. 14 in this series), the editors, widely regarded as leaders in the field in the Asia-Pacific region, have gone beyond broad citizenship education frameworks to examine the realities, tensions and pressures that influence the formation of the citizenship curriculum. Chapter authors from different societies have addressed two fundamental questions: (1) how is citizenship education featured in the current curriculum reform agenda in terms of both policy contexts and values; and (2) to what extent do the reforms in citizenship education reflect current debates within the society? From comparative analysis of these 11 case studies the editors have found a complex picture of curriculum reform that indicates deep tensions between global and local agendas. On one hand, there is substantial evidence of an increasingly common policy rhetoric in the debates about citizenship education. On the other, it is evident that this discourse does not necessarily extend to citizenship curriculum, which in most places continues to be constructed according to distinctive social, political and cultural contexts. Whether the focus is on Islamic values in Pakistan, an emerging discourse about Chinese 'democracy', a nostalgic conservatism in Australia, or a continuing nation-building project in Malaysia – the cases show that distinctive social values and ideologies construct national citizenship curricula in Asian contexts even in this increasingly globalized era. This impressive collection of case studies of a diverse group of societies informs and enriches understanding of the complex relationship between citizenship education and the curriculum both regionally and globally.

The First Book of Fashion Ulinka Rublack 2021-02-11 This captivating book reproduces arguably the most extraordinary primary source documents in fashion history. Providing a revealing window onto the Renaissance, they chronicle how style-conscious accountant Matthäus Schwarz and his son Veit Konrad experienced life through clothes, and climbed the social ladder through fastidious management of self-image. These bourgeois dandies' agenda resonates as powerfully today as it did in the sixteenth century: one has to dress to impress, and dress to impress they did. The Schwarzes recorded their sartorial triumphs as well as failures in life in a series of portraits by illuminists over 60 years, which have been comprehensively reproduced in full color for the first time. These exquisite illustrations are accompanied by the Schwarzes' fashion-focussed yet at times deeply personal captions, which render the pair the world's first fashion bloggers and pioneers of everyday portraiture. The First Book of Fashion demonstrates how dress – seemingly both ephemeral and trivial – is a potent tool in the right hands. Beyond this, it colorfully recaptures the experience of Renaissance life and reveals the importance of clothing to the aesthetics and every day culture of the period. Historians Ulinka Rublack's and Maria Hayward's insightful commentaries create an unparalleled portrait of sixteenth-century dress that is both strikingly modern and thorough in its description of a true Renaissance fashionista's wardrobe. This first English translation also includes a bespoke pattern by TONY award-winning costume designer and dress historian Jenny Tiramani, from which readers can recreate one of Schwarz's most elaborate and politically significant outfits.

Tea War Andrew B. Liu 2020-04-14 A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industries Tea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

INTELLIGENT AUTOMATION PASCAL. BARKIN BORNET (IAN. WIRTZ, JOCHEN.) 2020

Doing School Denise Clark Pope 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections

on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

The Social Life of Coffee Brian Cowan 2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

The Experience Economy B. Joseph Pine 1999 You are what you charge for. And if you're competing solely on the basis of price, then you've been commoditized, offering little or no true differentiation. What would your customers really value? Better yet, for what would they pay a premium? Experiences. The curtain is about to rise, say Pine Gilmore, on the Experience Economy, a new economic era in which every business is a stage, and companies must design memorable events for which they charge admission. With *The Experience Economy*, Pine Gilmore explore how successful companies—using goods as props and services as the stage—create experiences that engage customers in an inherently personal way. Why does

a cup of coffee cost more at a trendy cafe than it does at the corner diner or when brewed at home? It's the value that the experience holds for the individual that determines the worth of the offering and the work of the business. From online communities to airport parking, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating engaging experiences for both consumers and corporate customers. The Experience Economy marks the debut of an insightful, highly original, and yet eminently practical approach for companies to script and stage compelling experiences. In doing so, all workers become actors, intentionally creating specific effects for their customers. And it's the experiences they stage that create memorable-and lasting-impressions that ultimately create transformations within individuals. Make no mistake, say Pine Gilmore: goods and services are no longer enough. Experiences are the foundation for future economic growth, and The Experience Economy is the playbook from which managers can begin to direct new performances.
