Moghul was becoming a prominent voice for American Muslims even as he struggled with his relationship to Islam. In high school he was barely a believer and entirely convinced he was going to hell. To be true to himself, he needed to forge a unique American Muslim identity that reflected his beliefs and personality. How to Be a Muslim reveals a young man coping with the crushing pressure of a world that fears Muslims, struggling with his faith and searching for intellectual forebears, and suffering the onset of bipolar disorder. Motorized Obsessions Paul R. Josephson 2007-09-02 2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The Great University Gamble Andrew McGettigan 2013-04-09 In 2010 the UK government proposed huge cuts and market-driven reforms for Universities. The proposals provoked widespread opposition in the form of street protests, occupations, and online campaigns. As the dust settles, Andrew McGettigan surveys the emerging brave new world of Higher Education. Displaying a stunning grasp of the policy details, he looks at the long term impact of the changes, which have been obscured by the focus on tuition fee increases. What will be the role of universities within society? How will they be funded? What kind of experiences will they offer students? Written in a clear and engaging style, The Great University Gamble outlines the architecture of the new policy regime, which many find difficult to grasp. It is an urgent warning that our Universities are being transformed from institutions of real learning to profit-driven degree factories.
